Trusses are statically determinate when the entire bar forces can be determined from the equations of statics alone. Otherwise the truss is statically indeterminate. A truss may be statically (externally) determinate or indeterminate with respect to the reactions (more than 3 or 6 reactions in 2D or 3D problems respectively).

The conceptualization of the water fluxes is a prerequisite for understanding the hydrological behaviour of urbanized catchments. However, the identification of the hydrological components and their interactions, as well as the water balance in these areas present conceptual difficulties (Van de Ven, 1990). To start with, there is no simple definition of what constitutes an urban catchment.
